**YOUR ALTERNATIVE TO ORTHOPEDIC SURGERY**

### Can you heal without surgery?

We've found Regenexx procedures have replaced the need for up to 70% of elective orthopedic surgeries with our minimally invasive approach. Regenexx has helped thousands return to normal function with limited downtime and without invasive surgery.

### The procedure experience

Regenexx procedures are injection-based, outpatient procedures. On procedure days, blood or stem-cells are collected in the morning, processed in our on-site lab, and reinjected under ultrasound and/or fluoroscopy guidance in the afternoon. Most patients describe only moderate discomfort, and patients are encouraged to re-engage in activity within a week following the procedure.

### Next Steps

A dedicated patient liaison, who understands Coast Property Management's benefits, will help you through the process of scheduling an evaluation with a Regenexx physician and will walk you through your next steps at a clinic near you.
